## Whatsapp gb apk apk4fun

GBWhatsApp is an improved and customized mod of original WhatsApp and is most suitable for those who want to use two WhatsApp accounts on a single device. It is based on the WhatsApp Plus mod that was interrupted by the WhatsApp creators when they streamlined WhatsApp. The advantage of GBWhatsApp is that you can install it along with your original WhatsApp without any interference. You can also view messages that were deleted by the other user and can easily download photos that have been deleted in private chat or group chat. This version of WhatsApp is also best suited in case you get banned from the original WhatsApp. Accounts that get banned only get a small message: Your phone number is prohibited from using WhatsApp. Contact support for help. Whatsapp official usually does not issue any warning before banning an account and that's it you can't use WhatsApp anymore. But GBWhatsApp offers a bypass from the WhatsApp ban. The WhatsApp plus Mod stayed in circulation and due to the fact that we have GBWhatsApp that you can easily customize if you are a developer. GB WhatsApp has a tweaked UI for added features and uses the same license and protocol as WhatsApp. Once installed you can continue to use GBWhatsApp with a new number as a completely independent chat app. GBWhatsApp comes with lots of features and much more improvement. Also, it has many new themes and improved privacy policies. You can use this program to discover the hidden features of WhatsApp. The best app to enjoy two different accounts on the same device. You can hide your online status, send larger video files, more than 90 images can be sent at once instead of 10 images in WhatsApp. GBWhatsApp Features: GBWhatsApp supports many special features added to its latest Modded APK. Since this app comes from an independent developer AlexMods, thus it provides the app Anti-Ban feature & makes it Ban Proof. It works great on standard phones and there is no need for Root Access. But you can always check if your phone is rooted using the Root Checker app. You will also notice improved privacy while using this modded version of WhatsApp. You can turn off calls from specific people with the ability to block and unblock. In addition, change tick styles of your choice. Easy Hide your last seen ever by changing the settings in the privacy options. Normally you will not find these settings on the standard WhatsApp. You can also Hide double tick and customize the other tick settings. And the other person won't even know you've done this. In normal WhatsApp whatever change you make you have to implement it for yourself as well. But that's the beauty of GB WhatsApp where you only need to make changes in one way while enjoying everything yourself. Privacy and Personalization in GB WhatsApp In the latest update, you'll also have to set privacy on your status and can set on yourself or your contacts only. Or you can hide your status from specific contacts. This feature is only to GB WhatsApp. You can also stop receiving calls from everyone you want, or for everyone. Now talking about the fun features of GB WhatsApp includes Zooming profile pictures of your contacts. Just click on a photo and zoom in. Plus you also get a warning if one of your friends has changed their WhatsApp profile picture. Plus you can copy someone's status just open their copy status and download. Sharing media on this mode version is also fun and you can share up to 90 images in a single go. Audio clips can be up to 100 MB and video sizes can be up to 30 MB. Viewing the media is also very easy as everything downloads automatically and you just have to click and play. Please note that we do not recommend using GBWhatsApp because it is unofficial and offers encrypted. WhatsApp Inc. has officially begun to discourage the use of such apps. Learn more & you can customize your messenger themes and apply custom themes. It also offers a dark mode and a built-in emoji changer along with many GBWhatsApp themes. Customizations also include the ability to change missed call icons that are very helpful if you use GBWhatsApp for secret purposes along with the ability to change the call screen for your calls. All these features may seem fun but keep in mind that this version of WhatsApp is very modded and is uncertain compared to the official version. This is why this version has been removed from the playstore and poses a major privacy threat highlighted in this article. Hey guys. Here we have included the latest version of your favorite GB WhatsApp. Now download GB WhatsApp latest version APK v8.51 to enjoy new features and tricks. Upgrade to the latest version for a larger experience. Download and install it on your Android device normally. Now open GB Whatsapp, Enter Mobile Number & Verify by OTP. Yoohoo! You are all set to enjoy the cool features of GB WhatsApp's latest version. How to update GB WhatsApp to latest versionAs we all know that the update is not a big deal to do. But people are still searching for how to update Gb WhatsApp. Well, you need to get the latest version of GB WhatsApp from the download section. After downloading the file point to install and it will replace the old version with the new version of the app. So now you have the latest version of GB WhatsApp.GBWhatsApp 2020 MOD APK for AndroidIf you haven't heard about GB WhatsApp before, then here we clear about it to you. GB WhatsApp is an app that helps you create and run two WhatsApp account in one Android device. It can be installed and run on both non-rooted and rooted Android devices without any problems. It also comes with cool features that you won't get in your standard WhatsApp. The GB-WhatsApp is much better than WhatsApp Plus and OG WhatsApp. It is similar to yowhatsapp mod app. So, download and install the new version of GBWhatsApp from below. Also, check out the best cool features in GB WhatsApp that we've mentioned below. Sharing things related to knowledge, memorable moments of life on social media is a new trend now. Be it getting potential customers for business through campaigns or creating brand awareness, and big companies finding social media as a great platform. Billions of people are active on social media apps like Facebook, WhatsApp, Instagram, etc. daily. These apps are masters of their own fields. But if we talk about messaging applications, no one can beat WhatsApp. It attracts people with its cool features and free to use the app. We love WhatsApp not only because it's free but also we can enjoy ad-free messages. Ads are sometimes too annoying when using any app. After a few days fo its first release WhatsApp came with calling function that helped to free call using internet data. But after all these features people wanted more freedom and customization for the app. By default WhatsApp couldn't provide it, an Android developer Omar created this GB WhatsApp, a mod version of WhatsApp with new cool features along with all the standard features. As we mentioned before using dual WhatsApp with GB WhatsApp is super easy, if you have 2 numbers. But if you want to use GB WhatsApp as your only single then just remove the default WhatsApp. Wait before deleting it, be sure to back up your chat so you don't lose your old chat history. You might ask why I will use GB WhatsApp? Because you will love GB WhatsApp as it gives you full freedom to customize WhatsApp according to your desire, fresh UI, and many more. We have mentioned all the highlighted default features in the Details feature section. Don't forget to check it out. Messages and group limits in Latest GBWhatsAppAre you a WhatsApp, group admin? If your answer is yes, then GB WhatsApp is the best WhatsApp mod for you. Let me tell you why. With default WhatsApp literally, you don't have much control over what people post on your group. But once you start using GB WhatsApp, the available features for the group will surprise you for sure. You can have WhatsApp group names with 35 characters long. Control over who can post to groups. Restrict certain contacts or all posting to groups and can also make settings that will only allow you to post to groups. While messages in the group, you can mention someone's name with the message. Tell me what your idea of having a shipping list of 600 is. Isn't that amazing? Yes, you can have a list of 600 instead of the default 256 for the shipping list with GB WhatsApp. Fouad Mokdad's new FM WhatsApp mod also supports this feature. You can download it too. That helps you send a single message to all 600 members at once. A shipping list in GB WhatsApp is similar to 2.5 number of lists in default WhatsApp. All in all, it takes the broadcast function to a whole new level. Aside from sending with the latest auto-reply feature add-ons, now we can reply to messages even if we are offline. Set automatic replies for contacts, groups, or both with many other cool settings. Nowadays, everyone is concerned about their privacy and data security. While we send a message to someone in WhatsApp first, it shows a single gray tick. Then it changes to gray double tick when the recipient receives the message. Finally, it turns to a blue double tick that means recipients are reading your message. But for some reason, we don't want to let the sender know that we've seen the message. However, we don't have any function for it in standard WhatsApp. But with GB WhatsApp, we have dedicated privacy settings for the dual tick. We have control over ticks that it will stop showing blue tick even after we see any message. Along with this, there is more customization available for ticks that can change the appearance of it. Best features of GB WhatsAppThis GBWhatsApp mod apk has got all whatsapp features with some advance extra features. Hence, I'm just listing the extra cool features here. So, check these out. Hide Last Seen without a problem in one click. Send a broadcast message to 600 people instead of 250.Set Auto Reply for Any WhatsApp Message.Preview of photos and videos any loading. Privacy tricks like Hiding other blue tick. Theme store to install new themes. No copy of date and name while copying copies Messages. Send a video of size 50MB instead of 16MB. Send 90 photos (photos) at once instead of 10.Copy friends status in one click. Change the app icon and notification icon from settings. Update the status up to 250 characters instead of 139.And many more features, try and use it to find. Sorry, Not available for Apple iPhones (iOS devices). Steps to move from WhatsApp to GB WhatsApp without losing any DataDo you ever consider moving to GB WhatsApp from WhatsApp? If yes then this section is for you. If you had tried to move to GB WhatsApp before and canceled it at the last minute because you are afraid of losing data. Then don't worry this guide will cover it. Please go through the below steps, and you will move your old chats without any problems.& Before you start letting open the default WhatsApp and in the Settings & Chats section, take a backup of all chats.& I guess you already have GB WhatsApp with you and move on to the next step.& Install Gb WhatsApp then open it and press Agree and continue. & On the bottom of the next screen you will have an option Copy WhatsApp Data. tap this option to restore the old data to GB WhatsApp.& Now give the mobile number, and it will ask you to verify the number.& Next verify the number with the OTP message received on your number.& Now you can start using GB WhatsApp with all your old chats.& You can uninstall the default WhatsApp now.& Congratulations!
